## JAMES BROWN 76 ST. VINCENT STREET.

# Scottish Provident Institution

INSTITUTED 1837. INCORPORATED 1848.

IN this SOCIETY are combined the advantages of **Mutual Assurance** with **Moderate Premiums.**

THE PREMIUMS are so moderate that an Assurance of £1200 or £1250 may generally be secured from the first for the yearly payment which usually would be charged (with profits) for £1000 only—equivalent to an immediate Bonus of 20 to 25 per cent.

The WHOLE PROFITS go to the Policyholders, on a system at once safe and equitable,—no share being given to those by whose early death there is a *loss*. Large additions have thus been, and will be, made to the policies of those who participate, notwithstanding the lowness of the premiums.

The SURPLUS at last Investigation was **£1,051,035,** which, after reserving one-third, was divided among 9384 Policies entitled to participate. First additions (with few exceptions) ranged from 18 to 34 per cent, according to age and class. Other Policies were increased in all 50 to 80 per cent.

At the **53rd Annual Meeting** on 25th March last the following were the Results Reported for the year **1890.**

**New Assurances completed were £1,032,008.**

**Premiums in year £600,820.** **Total Income £907,648.**

**The Claims** (including Bonus Additions *) **were £431,466.**

* These averaged about 49 per cent on Assurances which participated.

**THE FUNDS** (increased by £363,150) **amounted to £7,356,619.**

The Expenses were under 10 per cent of premium income.

Arrangements as to SURRENDERS, NON-FORFEITURE, LOANS ON POLICIES, EARLY PAYMENT OF CLAIMS, FREE RESIDENCE, &c., are specially liberal.

[The usual *non-participating* Rates differ little from these Premiums.]

* A person of 30 may secure £1000 at death, by a yearly payment, *during life*, of £20:15s.
This Premium would generally elsewhere secure £800 only, instead of £1000.
OR, he may secure £1000 by 21 yearly payments of £27:13:4—*being thus free of payment after age* 50.

† At age 40, the Premium *ceasing at age* 60, is, for £1000, £33:14:2,—about the same as most Offices require during the whole term of life. Before the Premiums have ceased the Policy will have shared in at least one division of profits. To Professional Men and others, whose income is dependent on continuance of health, the limited payment system is specially recommended.

Danby's (Capt. John) patent cement is the most successful substitute for Portland cement for ship use ever invented. It is mixed with water, and applied same as Portland, but it is much lighter—10 tons being equal to 40 or 50 tons Portland. It sets quickly; is not affected by heat, cold, oils, or acids; is non-porous and non-conducting; its adhesive and expansive properties are extraordinary.
Danby's composition for tank tops, bunkers, &c., is a most effectual prevention against corrosion; also for land and marine boilers: recommended by Lloyds.—For particulars apply to John Campbell, jun. Royal Exchange, Glasgow, sole agent for Scotland and Ireland.
